Art Unit: 1712

1. The drawings are objected to because they do not comply with 37 CFR 1.84(t). Applicants must renumber the drawings in view of the cancellation of Figures 2 and 4. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

2. Claims 1 to 3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1 to 3, applicants require the step of adding excess sodium acetylide. This is indefinite since it is not clear what type of excess is intended (i.e. molar, volume, etc...) and it is not clear what this is in excess of (i.e. the silane reagents, alkali metal, etc...).

3. The instant claims are neither taught nor suggested by the prior art. Pope et al. claim a process in which steps b. and c. in the instant claims occur in opposite order. Ishihara et al. also fail to teach or suggest a process having the required steps a., b. and c. in the order as claimed.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Margaret G. Moore whose telephone number is 703-308-4334. The examiner can normally be reached on Monday to Wednesday and Friday, 10am to 4pm..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Dawson can be reached on 703-308-2340.
